

Telephony Services

IT Support made simple, effective and affordable.

TELEPHONE SYSTEMS

Boundary IT Services are able to supply and install business telephone systems to suit all sizes and budgets. Powerful, feature rich systems used to be out of reach for all but large corporations. All this has now changed with the introduction of professional, easy to use voice systems designed specifically for small to medium businesses.

FAX TO EMAIL

Fax 2 Email is a service that enables you to receive faxes directly to your desktop, mobile laptop or blackberry device. Faxes are converted whilst in the telephone network to pdf format, and emailed directly to the predetermined email address registered to the 0800, 0845 or 0870 number you have selected as your fax number. At present this service is only able to receive faxes sent from within the UK.

CALL PLANS

Boundary IT Services are able to offer a range of business call plans with the aim of reducing existing overheads and simplifying billing, by grouping together existing services onto one simple monthly bill.

As well as highly competitive line rental and call charges we can also provide a host of phone related services such as call divert, forwarding and barring, fax to email, outbound call recording and call screening for TPS compliance.

We even offer **3 months free line rental** in your first year.

All of our call plans offer the following advantages:

- **Save money on calls and lines**
- **One bill for all key telecom services**
- **Personal customer service**
- **No need to dial pin codes**
- **No requirement to change numbers**

VOIP

Boundary IT Services offer a selection of VOIP services aimed at small to medium businesses. VOIP can offer flexibility and cost savings unmatched by traditional analogue telephony.

WANT TO KNOW MORE?

If you more information on Telephone Systems, VOIP or call plans, please call us on **01903 232222** or email info@boundaryitservices.co.uk
